

## A Reminder from the Sidewalk Committee

As the weather changes, please remember to be considerate of your neighbors and the children who walk in front of your home and be especially cautious near school and public bus stops.

**Remove Obstacles** that block the line of sight along the sidewalks and streets in front of your home. This allows pedestrians, bikers, and drivers to see each other easily.

**Keep Sidewalks clear.** Rake leaves from sidewalks. Cut back bushes, tree limbs and branches on your property that overhang walkways.

**Shovel** the sidewalk in front of your house when it snows, keep it free of ice and snow, and do not throw snow in the street.

Make sure that private plowing contractors **do not block sidewalks** with snow or plow snow back into the street.

**Place trash in covered containers** and put out by 7:00 a.m. on the scheduled day for pickup. Remove emptied containers within 12 hours of being emptied.
